**Amendments to the Claims:**

A listing of the entire set of pending claims (including amendments to the claims, if any) is submitted herewith per 37 CFR 1.121. This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1-10 (Canceled)

**11. (New) A method comprising:**

receiving content information and application information related to the content information from an information carrier;

determining a sub-collection of documents based on the application information,

facilitating Internet access to documents within the sub-collection, and  
encumbering Internet access to documents that are not within the sub-collection.

**12. (New) The method of claim 11, wherein the application information includes an identification of the documents in the sub-collection.**

**13. (New) The method of claim 11, wherein the application information includes an identification of a location for determining the sub-collection.**

**14. (New) The method of claim 13, wherein the location includes one of the information carrier, another information carrier, an internet site, and a broadcast station.**

**15. (New) The method of claim 13, wherein the location is configured to provide an interactive presentation that constrains Internet access to only the documents that are within the sub-collection.**

16. (New) The method of claim 13, wherein the location is configured to provide a reference to the sub-collection.

17. (New) The method of claim 11, wherein at least one document in the sub-collection is identified by one of a Uniform Resource Identifier and a Uniform Resource Locator.

18. (New) The method of claim 11, including executing code of the application information to facilitate Internet access to the documents within the sub-collection.

19. (New) The method of claim 11, wherein the information carrier includes one of a portable medium and a broadcast medium.

20. (New) The method of claim 11, wherein the information carrier is a DVD.

21. (New) A player comprising:

- a reader that is configured to receive content information from an information carrier, and

- an access device that is configured to provide Internet access,
  - wherein

- the reader is configured to selectively receive application information related to the content information from the information carrier, and

- the access device is configured to:

- determine a sub-collection of documents based on the application information,

- facilitate Internet access to documents within the sub-collection, and
    - encumber Internet access to documents that are not within the sub-collection.

22. (New) The player of claim 21, wherein if the reader does not read the application information, the access device is configured to provide unencumbered Internet access.

23. (New) The player of claim 21, wherein the access device is configured to provide Internet access only when the information carrier is operatively coupled to the reader.

24. (New) The player of claim 21, wherein the application information includes an identification of the documents in the sub-collection.

25. (New) The player of claim 21, wherein the application information includes an identification of a location for determining the sub-collection.

26. (New) The player of claim 21, wherein the access device is configured to execute code of the application information to facilitate Internet access to the documents within the sub-collection.

27. (New) The player of claim 21, wherein the information carrier includes one of a portable medium and a broadcast medium.

28. (New) An information carrier that is configured to include content information and application information that is related to the content information, wherein the application information is configured to enable a receiver of the information carrier to determine a sub-collection of documents based on the application information, facilitate Internet access to documents within the sub-collection, and encumber Internet access to documents that are not within the sub-collection.

29. (New) The information carrier of claim 28, wherein the application information is configured to enable the receiver to provide an interactive presentation that constrains Internet access to only the documents that are within the sub-collection.
